200

I am opposed to the Juneau road as it will prove much more costly to build than now proposed and takes money away from projects that are of much greater need - is is not necessary as the Alaska Marine Highway serves the same purpose. The AMH should be treated as part of the highway system, it is safer and more reliable than the land route could ever be. Plus, most of the people of Southeast prefer the Ferry.

Money allocated to the road project, plus money allocated for bridges to nowhere should be put into the ferry system and into repairing and improving safety standards of existing roads and highways.

Sincerely,

Patricia Blank
